Patent Pending 01/20

TLL-500A is an energized conductor supporting tool that helps to create work clearances for lines 34.5kV to 72.5kV.

It replaces the need for temporary structures and tag lines while giving positive control of distribution live lines.

TLL-500A Skid

- Stores all the components of the TLL-500A
- Components are pinned to the structure of the skid
- Components are placed in order of assembly to make building/tearing down the unit easier

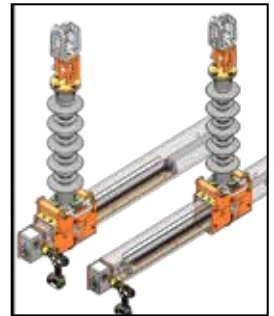

Features:

TLL-500A Series 1

- Voltage ratings: 34.5kV - 72.5kV
- 500 lb. vertical and horizontal capacity
- 8' max / 3'8" min between insulators
- 16' max / 7'4" min overall span
- Insulator sliders can pin every 3"
- Mounts to crane or digger derrick
- Mast turntable allows for 15° swivel left or right when the TLL-500A is in-line with the crane boom or perpendicular.
- Converts from horizontal to vertical configuration

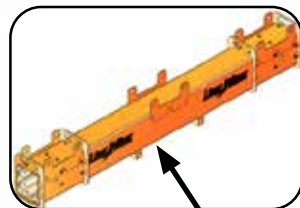

TLL-500A Series 2

- Same components as TLL-500A Series 1, except the pinning of the slider every 3" has been replaced with a lead screw assembly when torque is applied from an impact driver
- Allows for 30" of insulator travel

Insulators

- 69/72.5 kV and lower
- ~75 lbs.
- Polymer (lower weight, lower height)

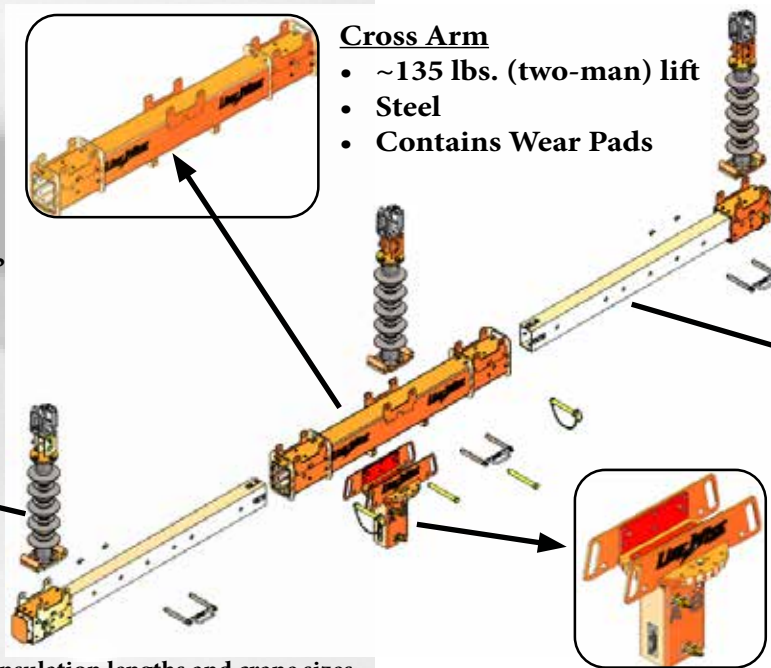

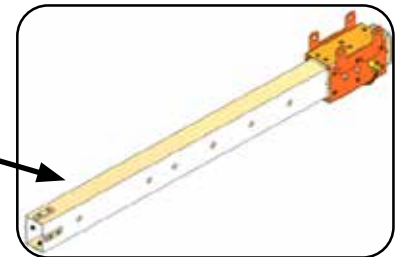

Cross Arm

- ~135 lbs. (two-man) lift
- Steel
- Contains Wear Pads

Extension Arms

- ~70 lbs.
- Aluminum Tube
- Steel Insulator Slider (contains wear pads)
- Able to pin slider every 3"

Mast

- ~80 lbs.
- Steel
- Contains Turntable to allow for swivel
- Pins to crane adapter

*Weight will vary for different insulation lengths and crane sizes.
