

Our unique patent-pending Sag Plate is a rigging apparatus used to sag and terminate conductors off the dead-end yoke plate. This allows the user to eliminate all excess rigging from the yoke plate back to the pole/tower and reduce men and equipment hours, ultimately increasing productivity and profitability.

SPECIFICATIONS

	SAG Plate
Capacity	25,000 lb
Weight	
with shackle	50 lb (23 kg)
without shackle	32 lb (15 kg)
Dimensions	28.25 long x 7.625 wide x 7.625 tall

FEATURES

- One SAG plate is used per conductor to create a solid connection with the yoke plate so the conductor can be tensioned for installation to the yoke plate
- Utilized with multiple bundle configurations including double, triple, and quad bundles
- Can also be used in conjunction with our LineWise Insulator Spreader to create an even more efficient work set up.
- Locks together with shackle (included) or other shackle
